Preface

Why this book? It was the question that prompted us to find answers in this form. Despite obtaining rigorous theoretical and practical lessons during degree, diploma, and post-graduation, most of today's Ophthalmologists are finding themselves in gridlock when confronted with actual clinical and surgical situations. In the present era doing fellowships has become of utmost importance because, in fellowships, they are hand-held further a while before letting on to the field. Fellowships help in shaping up the future, aid to have maximal clinical and surgical exposures. This special experience instills a strong foundation for a successful career to young doctors sailing on the learning curve. Like in all streams medicine, the availability of multiple options is making the web more complex. The key is to choose the right training program suiting best to one's interests, and dexterity has become precious. There is no centralized admission process and counselling. Many times residents conduct a fishing expedition to decide which institutions to apply, when to apply, and/or how to apply. In this process, they lose substantial opportunities besides wasting time and energy. This booklet intends to bridge the gap between young Ophthalmologists and the esteemed ophthalmic institutions. The lack of a comprehensive list of institutions providing fellowships led us to compile this e-book. We hope it will aid all fresh pass-out residents, who, despite having abundant talent struggle to hit the best out of available fellowships, to shape their future happiness. Feel free to reach us at eophtha@gmail.com and rohitrao@gamil.com to send your feedback.

Dr Rohit Rao S. MBBS, MS, FACS
Editor, eOphtha
Consultant, Shri Ganesh Vinayak Eye Hospital, Raipur (CG)

Dr Soumya Podury
Asst. Editor eOphtha
MBBS, DNB, FICO, MRCSed (Ophth)

The idea of e-Ophtha, e-learning portal in the stream of ophthalmology, was envisioned, conceived and commenced initially in the form of a blog by Dr Parthoprattim Dutta Majumder, a senior consultant in Uvea Department, in the year 2007. This transitioned into a website format just in one year i.e. in the month of August 2008. It is one of its kind online Ophthalmological education portal. It gives opportunity to publish articles and presentations online. There is no look back since then. e-Ophtha commanded to be considered as key resource or the go to website for any postgraduate in this stream of medical education. The team under the guidance of Dr.Partho wants to remove lacunae in Ophthalmology education with the help of e-ophtha website to the maximum possible extent. It is currently hosting multiple aspects of Ophthalmology education resource catering to postgraduates like Articles, power point presentations, student's gallery, Question papers, Blogs, general trivia, fellowship options, etc. The most innovative aspect of e-Ophtha is that we encourage and provide young talented Ophthalmologist platform to publish their works in the form of Articles and Presentations. We welcome your contributions in the form of Articles, PowerPoint Presentations, Short Reviews, Ophthalmic Cases, Question papers, Blogs, practical situations requiring elucidation in this stream and unhesitating feedback. Feel free to write to us at eophtha@gmail.com.
